

Benjamín Espina

Software Developer · Experience as Functional Analyst · Advanced Systems Engineering Student (UTN)

Córdoba, Argentina | benjaespina98@gmail.com | +54 353 422 4607 | linkedin.com/in/benjamin-espina | github.com/benjaespina98 | benjaminespina.com

PROFESSIONAL PROFILE

Software developer with a fullstack profile (Angular, React, Node.js, C#) and hands-on experience building real products end to end, including scripting and automation with Python. I integrate AI tools (GitHub Copilot, Claude, ChatGPT) as a native part of my daily workflow, from prototyping to debugging and documentation. My background as a Functional Analyst at a corporate healthcare group gives me a clear read on the business logic behind every feature I build, and lets me translate business requirements into technical specifications with real implementation judgment. Advanced student of Information Systems Engineering (UTN FRC) — thesis defended and approved.

WORK EXPERIENCE

Functional Analyst — URG Urgencias, Grupo OSDE

Dec 2023 – Mar 2025 · Córdoba, Argentina

- Gathered requirements and documented processes in Trello (Kanban) across multiple internal clients simultaneously.
- Automated WhatsApp/Email notifications for 5 medical centers, eliminating repetitive manual work.
- Ran functional validations and user acceptance testing (UAT) on external deliverables prior to each production release.
- Logged and tracked incidents identified during validation through to resolution, working directly with the development team.
- Diagnosed issues in SQL Server (queries, stored procedures, business logic) in live production environments.

Web Development & Process Improvement — Playa y Sol S.A.S. (family business) *Ongoing · Villa María, Córdoba*

- Built a web-based quoting tool and an online store (shopping cart) for the family business, gathering business needs and translating them into a working solution.
- Identified and proposed process improvements for internal operations.
- Managed digital presence (Instagram, Facebook, website) and designed graphic assets for brand campaigns.

Full Stack Developer — Personal & Freelance Projects

Oct 2023 – Present

- End-to-end development of web applications and Progressive Web Apps, from problem analysis to production deployment.

EDUCATION

Information Systems Engineering — UTN FRC (Córdoba)

Thesis defended and approved · Advanced student (remaining final exams in progress)

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, Python

Frontend: Angular, React, HTML5, CSS3

Backend: Node.js, REST APIs

Databases: SQL Server, MongoDB

Tools: Git, Azure DevOps, CI/CD, Kanban/Scrum

Applied AI: GitHub Copilot, Claude, ChatGPT — daily use for coding, debugging, and documentation

Languages (spoken): Spanish (native), English (B2)
